According to the CDP Carbon Majors Report 2017, 100 companies are responsible for 71% of global emissions which are a direct cause for the increase in the global heat index. This large chunk of global emissions has a direct link to rapid climate change.
UNITED NATIONS WARNS ONLY 12 YEARS LEFT

The top climate scientists of the United Nations say we have 12 years left before we are past the point of no return.

MONEY OVER ENVIROMENT

ExxonMobil, Shell, BP and Chevron are identified as among the highest emitting investor-owned companies since 1988. If fossil fuels continue to be extracted at the same rate over the next 28 years as they were between 1988 and 2017, says the report, global average temperatures would be on course to rise by 4°C by the end of the century. This is likely to have catastrophic consequences including substantial species extinction and global food scarcity risks.

WHAT IS TO BE DONE?

The state under the control of the global capitalist forces never cease to destroy regulations in order to continue polluting while militarizing its state apparatus in order to secure itself against the inevitable revolt when all chaos breaks out.

The only option now is socialist planning or environmental apocalypse!
